

I benefit from listening to XM Satellite Radio and its traffic and weather channels. I live 2 1/2 hours from where I work. XM provides me with up to date information as well as a consistently high quality of radio. Satellite radio provides variety and quality that are not available elsewhere especially living in extreme rural areas such as Ossipee, NH. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
